Graphic Design: Interactive II – Spring 2016

Project 1: Restaurant Website
Due Date: Tuesday, February 23 at 9:00 pm Mountain Time.

Project Description

You are going to develop a website for a restaurant. The name and type of the restaurant is up to you.

Each page of the website will need a header, content area, sidebar, and footer. Each page of the website should have the following information:

- Restaurant Name (header)
- Navigation (header)
- Daily Specials (sidebar)
- Hours of Operation (sidebar)
- Address (footer)
- Phone Number (footer)
- E-mail Address (footer)
- Link to Google Maps (footer)

The website will include the pages listed below. The content area for each page is also described for you.

Homepage

The homepage will include a photo, a one paragraph welcome letter from the owner, and a customer testimonial.

Menu

The menu page will include a table of menu items and prices. The menu page needs to include at least 5 categories of items, and each category needs to include at least 5 menu items.

Photo Gallery

The photo gallery page will include a grid of thumbnail photos in 4 columns. When you click on a thumbnail photo, a larger version of the photo should appear. The photo gallery page needs to include at least 12 photos.

Testimonials

The testimonial page will include customer testimonials. Each customer testimonial will be one sentence long. The customer name must be included for each testimonial. The testimonials page needs to include at least 5 testimonials.

Styling

You do <u>NOT</u> need to design a logo for the restaurant. You will need to develop a color scheme for the website that consists of at least three colors.

Grading

This project is not a design project. While you need to make your website look presentable with a color scheme, the grading focus of this project will be on:

- Using appropriate HTML tags for your content.
- Using CSS to style HTML content.
- Cleanliness and organization of HTML and CSS, especially code indentation.
- Making sure all of your internal links work.

Turning In Your Work

Your project must be uploaded to your GitHub account by Tuesday, February 23 at 9:00 pm Mountain Time. I will assist you with configuring your project with GitHub before the due date. You are welcome to commit your project to GitHub as you work on it, but remember, your GitHub repository is public and can be viewed by anyone.
